PROFESSIONAL SUMMARY

CIS student at James Madison University with a track record of independently scoping, prioritizing, and shipping consumer products end-to-end, from defining MVP feature sets and monetization tradeoffs to launching production applications. Combines product thinking with hands-on technical fluency (TypeScript, Python, SQL) across AI, marketplace, and e-commerce domains.

EDUCATION

James Madison University

BBA, Computer Information Systems. Academic Dean's List. GPA: 3.22.

Harrisonburg, VA

Expected May 2028

SKILLS

Product and Analysis: MVP Scoping, Feature Prioritization, Product Requirements, User Flows, SQL, Power BI, Excel

Frameworks and Technologies: Next.js, React Native, Expo, Supabase, OpenAI API, Stripe, Vercel

Languages: TypeScript, Python, Java, HTML/CSS

Developer Tools: Git, GitHub

PROJECTS

AssignmentAI

March 2025 – Present

Full-Stack AI Application

- Scope MVP for an AI tool enabling teachers to generate customized student assignments from plain-language prompts; prioritize the core prompt-to-assignment workflow to ship faster and design grade-level differentiation based on identified teacher pain points
- Built with TypeScript, OpenAI API, Supabase, Vercel

Alyne

December 2025 – Present

Mobile Marketplace

- Define product requirements and MVP scope for a two-sided wellness marketplace, prioritizing booking, discovery, and provider profiles over lower-impact features; design the platform's monetization model balancing provider adoption against revenue
- Built with TypeScript, React Native, Expo, Supabase

QuadWear

March 2026 – Present

E-Commerce Platform

- Identify a niche product opportunity in hand-drawn, university- and major-themed apparel; scope the storefront around that opportunity and launch a full purchase flow from product catalog through Stripe checkout
- Built with Next.js, TypeScript, Stripe, Vercel

EXPERIENCE

Math Tutor

April 2022 – October 2023

Mathnasium Learning Center

Alexandria, VA

- Tailored instruction for up to 12 simultaneous students with individual learning needs, managing competing priorities across sessions
- Tutored 100+ students across individual and group sessions, coaching effective study habits and exam strategies
- Developed and distributed custom math resources to reinforce student comprehension

ACTIVITIES & LEADERSHIP

Hayfield Track and Field

February 2024 – May 2024

Sprinter

- Competed in 10+ sprint events; trained 5 days per week developing explosiveness, acceleration, and relay coordination
